**Addison-Wesley Interactive**

<http://www.aw.com/awi.html>

Addison-Wesley Interactive (AWI) is a new publisher of interactive media products for college-level courses in mathematics, physics, engineering and statistics. We are a division of Addison-Wesley Publishing Co., which is recognized worldwide as a leader in scientific and technical publishing. AWI is developing new educational products that are separate and distinct from Addison-Wesley's textbooks.

We are creating our products in partnership with leading educators who have a vision for the best use of interactive media in their discipline. Our products use the unique capabilities of multimedia to create new interactive learning environments that surprise and delight students and educators.
