Dedication**Acknowledgments**

I thank students and colleagues at the School of Information Management of Victoria University of Wellington (NZ), the College of Information Science and Technology at Drexel University, the College of Information Studies at the University of Maryland, the New Jersey Institute of Technology, and Telcordia Technologies (formerly Bellcore). A great many people have given support and advice in this project. Among these are: Toni Carbo, Anthony Debons, Lee Giles, Ron Larsen, and Michael Lesk.

(to be completed)

Contents

Preface	iii
Contents	v
1. Information	1
1.1. Information and Representation	1
1.2. Interactivity and Experience	6
1.3. Systems	10
1.4. Information Resources and Information Systems	12
1.5. Information Technology	21
1.6. The Language of Information	22
2. Symbol-based Representations and Descriptions	29
2.1. Categories and Classes	29
2.2. Knowledge Organization Systems	33
2.3. Information Resources	37
2.4. Data Schemas and Metadata	40
2.5. Subject Languages: Descriptions Based on Document Content	48
2.6. Content Coordination Widgets	53
2.7. Hypertext and The Web	54
3. Tasks, Entertainments, and Design	65
3.1. Information Behavior	65
3.2. Look – Information Seeking Behavior	67
3.3. Complex Questions and Searches	71
3.4. Decide	78
3.5. Tasks	85
3.6. Information and Task Environments	88
3.7. Entertainment, Engagement, and Experience	90
3.8. Problem Solving and Planning	90
3.9. Design	95
3.10. Data Models and Databases	101
3.11. Models for States, Flows, and Discrete Systems	104
4. Cognition, Emotion, and Human Interaction with Computers	113
4.1. Cognition and Emotion	113
4.2. Perceptual Processing	115
4.3. Cognitive Structures and Processes	120
4.4. Complex Cognition	124
4.5. Beliefs and Attitudes	129
4.6. Emotion, Affect, and Motivation	131
4.7. Psychology in the Wild	136
4.8. Human-Computer Interfaces and Human-Computer Interaction	136
4.9. Individual Differences and Personalization	140
4.10. Personal Information Management	145

5. Social Interaction and Social Systems	151
5.1. Social Structures and Social Networks	152
5.2. Social Capital	160
5.3. Social Control	163
5.4. Participation in Society	166
5.5. Small Groups and Computer-Supported Collaborative Work	171
5.6. Organizations	178
5.7. Institutions and Communities	181
5.8. Culture	183
5.9. Education	185
5.10. Everyday Information Skills and Critical Thinking	198
5.11. Judging and Interpreting the Past: History and Evidence	201
6. Language and Communication	207
6.1. Natural Language	207
6.2. The Structure of Natural Language	210
6.3. Language and Interaction: "Doing things with Language"	217
6.4. Conversation and Dialog	226
6.5. Formal Models for Language	231
7. Information Institutions and Infrastructures	237
7.1. Information Institutions	237
7.2. Libraries and Library Services	238
7.3. Organizational Information Systems, Knowledge Management, and Enterprise Content Management	241
7.4. Records and Records Management	250
7.5. Archives	253
7.6. Collections of Physical Objects	265
7.7. Information System Architectures and Web Engineering	266
7.8. Sets of Services and Service Platforms	269
7.9. Managing Collections of Information Resources: Digital Repositories and Service-Oriented Architectures	271
7.10. Software Engineering	274
7.11. Organizational Information System Management	282
7.12. Highly Adversarial Situations	287
8. Social Informatics and Economics	297
8.1. Social Policy: Freedom and Control of Information	297
8.2. Social Policy: Intellectual Property	299
8.3. Social Policy: Privacy, Anonymity, and Surveillance	307
8.4. Government and Social Decisions	312
8.5. Policy, Law, and Regulation	316
8.6. Disaster Planning, Crisis Management, and Emergency Response	320
8.7. Economics	322
8.8. Controlling and Managing Complex Systems	332
8.9. Globalization and Development	332
8.10. Management and Business	333
8.11. Functional Units of Businesses and their Use of Information	342

8.12. Information Economics, Information Goods, and Knowledge Markets	351
8.13. Innovation	362
9. Scholarship, Science, Big Data, and Domain Informatics	369
9.1. Scholarship	369
9.2. Science	375
9.3. Measurements and Instrumentation	380
9.4. Science, Technology, and Society	381
9.5. Data, Data Sets, and the Data Grid	384
9.6. Mathematics and Logic	392
9.7. Biology as an Information Science	393
9.8. Medical, Clinical, and Health-Care Informatics	397
9.9. Spatio-Temporal Information Systems	403
10. Human Language Technologies	413
10.1. Text	413
10.2. Reading	422
10.3. Writing and Text Communication	425
10.4. Natural Language Processing	429
10.5. Information Extraction from Text	431
10.6. Text Categorization and Summarization	434
10.7. Text Document Retrieval Systems	436
10.8. Search Engine Interfaces	440
10.9. Indexing and Searching the Web	443
10.10. Incorporating Social Information and Events into Searches	446
10.11. Automated Question Answering	449
10.12. Cross-Language Processing	450
10.13. Conversational Agents	453
11. Multimedia, Hypermedia, Simulations, and Games	457
11.1. About Multimedia, Hypermedia, and Entertainment Technologies	457
11.2. Visual Information	458
11.3. Audio	461
11.4. Active Visual Media	469
11.5. Hypermedia	474
11.6. Digital Games	476
11.7. Modeling and Simulation	479
11.8. 3-D-objects, Tangibles, Robots, and Physical Environments	483
A. Appendix	491
-A.1. Information Theory	491
-A.2. Compression	494
-A.3. Graph Theory	500
-A.4. More Models	507
-A.5. Algorithms	507
-A.6. Additional Search Engine Procedures and Algorithms	512
-A.7. Logic	515
-A.8. Probabilities and Probabilistic Inference	520

-A.9. Formal Models for Decision Making	522
-A.10. Mathematical Models	525
-A.11. Learning Mechanisms and Machine Learning	533
-A.12. Biological Basis of Human and Social Information Processing	538
-A.13. Encryption and Cryptography	541
-A.14. Servers and Networks	546
-A.15. Transmission and Networking	548
-A.16. The Internet	554
-A.17. Computing Architectures and Operations	555
-A.18. Input/Output Devices	558
-A.19. Sensor Technology	560
-A.20. Storage Technology	562
